

Get the most from your EyeMed benefits – and save money!

Summer is a popular time to utilize vision benefits. You may not even think about your vision benefits until it's time to make an appointment for an annual eye exam. Before you head to the provider, know that EyeMed members can save money and spend less out of pocket with the easy tips below.

Tip #1: Shop around – including online

One of the easiest ways to save money is to shop around. Glasses or contacts don't need to be purchased where a member got their exam. While it may be convenient, it may not be the economical option. Try on as many frames as you need until you find the right pair at the right price for you. If shopping for contacts, online may be the way to go. If you know the brand and type you wear, buying online from an in-network provider can offer big savings (see Tip #2). Find an in-network provider by clicking "find an Eye Doctor" in the top right [here](#).

Tip #2: Take advantage of Special Offers

EyeMed exclusive Special Offers can be stacked on top of benefits. New savings are added throughout the year, so it's always worth checking these out. For example, Target Optical online is offering \$150 savings on a year's supply of contact lenses. You don't have to live near a Target to take advantage of this offer - This is big savings! These offers can be found on the Member Web, EyeMed App or inside the Know Before You Go tool. Learn more [here](#).

Tip #3: Knowledge is Power!

The EyeMed Know Before You Go Tool is packed with information about the world of vision correction. The education section has info about polycarbonate lenses, ultraviolet coating, photochromic lenses and more. Then take that knowledge and use the cost estimator to get a good idea if out-of-pocket costs are expected. The estimator knows your exact benefits, so it isn't a generic estimate – it's an informed estimate. Learn more [here](#).
